

# Viridis Demo

## My first acquaintance with R Markdown

The code below demonstrates two color palettes in the viridis package. Each plot displays a contour map of the Maunga Whau volcano in Auckland, New Zealand.

### Viridis colors

```
image(volcano, col = viridis(200))
```

### Magma colors

```
image(volcano, col = viridis(200, option = "A"))
```
